

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1-13. Cancelled

14. (currently amended) A method of treating a human suffering from spasmodic torticollis ~~a dystonia~~, the method comprising the steps of administering up to 1,000 units of a botulinum toxin type A to a human spasm suffering from spasmodic torticollis ~~a dystonia~~ until the human experiences a loss of clinical response to the administered botulinum toxin type A, as determined by a failure of the administered botulinum toxin type A to substantially alleviate a symptom of the spasmodic torticollis ~~dystonia~~; and administering up to 300 units of a botulinum toxin type E that has a spasmodic torticollis alleviating activity of from one to four days to the human after the human exhibits a loss of clinical response to the administration of botulinum toxin type A to thereby again achieve a substantial alleviation of a symptom of the spasmodic torticollis ~~dystonia~~.

15. (Cancelled)

16. (Previously presented) The method of claim 14, wherein the amount of botulinum toxin type A is less than 500 units.

17. (Cancelled)

18. (Previously presented) The method of claim 14, wherein the amount of botulinum toxin type A administered to the human is from 80 units to 460 units,

and the amount of botulinum toxin type E administered to the human is less than 300 units.

19. (currently amended) A method of treating a patient suffering from a spasmodic torticollis ~~cervical dystonia~~, the method comprising the steps of administering up to 1,000 units of a botulinum toxin type A to a human patient suffering from spasmodic torticollis ~~a dystonia~~ until the human experiences a loss of clinical response to the administered botulinum toxin type A determined by a failure of the administered botulinum toxin type A to substantially alleviate a symptom of the spasmodic torticollis ~~dystonia~~; and administering up to 300 units of a botulinum toxin type E that has a spasmodic torticollis alleviating activity of from one to four days to the patient to treat the spasmodic torticollis ~~cervical dystonia~~ after the patient exhibits a loss of clinical responsiveness to the administration of botulinum type A.

20. (Cancelled)

21. (Previously presented) The method of claim 19, wherein the amount of botulinum toxin type A is less than 500 units.

22. (Cancelled)

23. (Previously presented) The method of claim 19, wherein the amount of botulinum toxin type A administered to the patient is from 80 units to 460 units, and the amount of botulinum toxin type E administered to the patient is less than 300 units.

24. (Cancelled)

25-26. (Cancelled)
